

Divine Engineerings

Pressure Equipment | Filters | Hydraulics | OEM Spares

Thought Engineered into Reality

Our diverse product range offering, places us in a unique and prominent position within this industry; allowing your business to take advantage of our single site facility for design, engineering, project management, production resources and manufacturing capacity.

About Us

Divine Engineerings (DEs) is into design and manufacturing of industrial products serving wide range of industry. DEs has long experience of working with consultants & end users involving third party inspection and manufacture products compliant to regulatory as well as international standards requirement and have built a solid reputation for quality and reliability. We are assisted by a team of experienced and skilled professionals who are committed to meet the varied demands of clients without compromising on the quality.

We are a trusted and leading privately owned company, which specialise in design and manufacturing of products; aiding the safe storage and movement of the essential commodities that drive the industry forward.

What we do

We design and manufacture Pressure Equipments (incl. Pressure Vessels, Reactors, Heat Exchangers, etc.), Storage Tanks, Heavy Structural items and Customized skids for wide range of industries, which solve problems and provide effective solutions without compromise. Enriched with years of product knowledge and industry experience, our solutions make your job easier, while saving your time, allowing you to remain focused on your core business goals. With product lines including Strainers, Filters,, Hydraulic System & Components and Equipment & Machinery Spare Parts; we are confident we can assist with any requirements you have. Fully equipped in-house services for effective design, quality engineering and efficient project management ensures the success of your project.

LOTUS range of products manufactured by us caters to requirements of the industry in the subject of filtration and separation. We believe in continuous improvement or addition of more products to our existing range by in-house development or in technical collaboration with the industry expert.

Our facilities

DEs operate from a single 10,000 sq.ft. manufacturing plant, situated near Mumbai in India. Our multi-trade workforce and management team is enriched with years of product knowledge and industry experience and with in house production capabilities, DEs gain the huge benefit of flexibility and overall control of a project. This enables very high product quality, retains fluidity and greatly reduces sub contract involvement into all aspects of a project.

Our commitment

Our strong focus on innovation and access to R&D gives us the opportunity to design and build new kind of products and reinvent existing ones.

We believe in delivering product and solution to our customers which not only meets their requirements but exceeds them.

Thought Engineered into Reality

Pressure Equipment

The movement and storage of your essential commodities underpins the foundation of your business and as such, needs to be treated with exceptional professionalism. Divine Engineerings' 10,000 sq. ft. well equipped plant has capabilities to produce large scale 5m diameter vessels up to 40m in length and in material thicknesses upto 100mm. All works are designed and constructed in accordance with international standards and codes and supplied with complete supporting certification.

Pressure Vessels and Storage Tanks

We are specialists in the mechanical design, engineering and fabrication of carbon steel, stainless steel and other alloy steel low and high pressure vessels and storage tanks as per ASME Section VIII, Division 1 or any other international standards.

Pressure Vessel Types

- Oil, Gas & Air Separators
- Surge Vessels
- Cryogenic Vessels
- Compressed Gas Tanks
- Expansion Tanks
- Condensate Tank
- Flash Tank
- Blowdown Tank
- Air Receivers

Storage Tank Types

- V1 Tanks / Drums
- Hoppers
- Bin
- Silos

Process Equipments

Industrial process are procedures involving chemical or mechanical steps to aid in the manufacturing of a product or products, usually carried out on a very large scale. This is achieved through equipment specifically designed for that process in a particular industry; however names of these process equipments vary based on the industry.

Process Equipment Types

- Reactors
- Heat Exchangers
- Evaporator and Dryers
- Fractionating or Distillation Columns
- Scrubbers
- Filtration Vessels

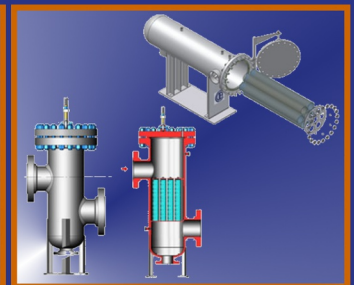

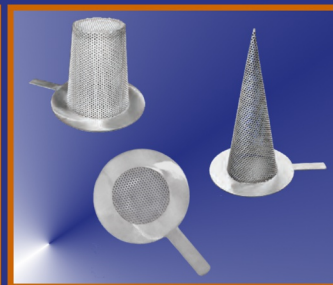

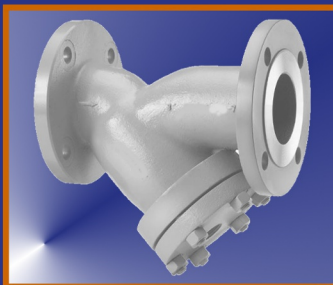

Thought Engineered into Reality

Filtration / Separation Equipments

LOTUS i range of products manufactured by us caters to requirements of the industry in the subject of filtration and separation. For fluid filtration, we manufacture 'Y' type strainer, Basket Strainer, Cartridge Filter and Temporary Strainer. For solid & liquid separation from gas, we have products such as Vapor-Liquid Separator, Cyclone Separator, Bag Filter, Coalescer, etc. We believe in continuous improvement or addition of more products to our existing range by in-house development or in technical collaboration with the industry expert.

Filtration / Separation Equipment Types

- Y Strainer
- Simplex Basket Strainer
- Duplex Basket Strainer
- Cartridge Filter
- Temporary Strainer

Skid Process Systems

Process Skid Package is a process unit contained within a frame that allows the process system completely assembled with equipments, valves, instruments and rotating equipments to be easily transported and installed at site. We offer a single source solution for custom integrated Skid Packages to create mechanical and electrical skid mounted systems that are pre-wired and mounted on a common base.

Skid Process System Types

- Filtering & Flow Metering Skids
- Centrifuge Systems
- Chemical Injection Package
- Pilot Plants
- Water Treatment Systems
- Tanker Loading / Unloading Skids

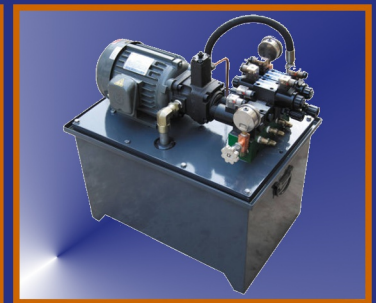

Thought Engineered into Reality

Hydraulic System and Components

A Hydraulic system is one of the drive systems which are being used for the control of machinery and equipment. The complexity of a hydraulic system depends on its specific use, however all hydraulic systems have the same basic components: Reservoir Oil Tank, Hydraulic Pump, Power Source, Actuator, Valves, Filter and Piping.

Hydraulic System and Components manufactured by us

- Hydraulic Cylinder Actuators
- Accumulator
- Hydraulic Power Pack
- Lube Oil System
- Hydraulic & Pneumatic Fittings
- Hydraulic Component Spare Parts

Equipment and Machinery Spare Parts (Steel & Cement Industry)

We supply Industrial Spare Parts or Components for all types of Equipment and Machinery for use in the cement and steel industries. This includes, amongst others, mechanical, hydraulic, pneumatic, electrical and automation parts and components.

For special job, a drafting service is offered to prepare patterns and designs for parts and components and to arrange for non-original manufacture or fabrication. We also offer tailor-made service to fabricate and supply hard-to-get or obsolete parts and components.

Steel Unit - Spares & Consumables

- Pinch Roll Units
- High Speed Mill
- Rolling Mill
- Flat Rolling Mill
- Section Rolling and Pipe Rolling
- Pipe Manufacturing Forming Rollers
- General spares

Cement Unit - Spares & Consumables

- Crusher, Stacker & Reclaimer
- Raw Mill, Pre- Heater & Grate Cooler
- Conveyors and Feeders
- Kiln & Packing Plant
- H T Fasteners, Forged Foundation Bolts
- Refractory Accessories & Anchor Bolts
- General spares

Thought Engineered into Reality

Structural & General Fabrication

Complementing our work on pressure vessels and pressure systems, the company is able to use its principle fabrication competencies to manufacture products for a variety of different users. We are frequently commissioned to manufacture structures to supplement the pressure vessel contracts - examples include platforms, vessel skirts, ladders and walkways, support assemblies, pipe work spools and other associated units.

Structure Types

- Bases / Skids
- Pedestals
- Handrails and Ladders
- Structural steel frames
- Pipe Supports

Our Association / Division

We are associated by our associates / division with their respective expertise in our goal to deliver reliable and quality products.

Jyoti Engineering Services

We are a contract machining and assembly facility with specialization in innovative steel component engineering & fabrication. We've been producing high-strength steel components for companies, right from critical aerospace machine parts to heavy machining with shaft diameter of 3 meter & length upto 10 meter. We can assist you on component prototype development through to complex assembly production runs.

LOTUS i Technology Solutions

We collaborate with leading manufacturers to provide high quality products our customers need to meet their desired end result. We are the leading suppliers of valves, fittings and specialty products used by industrial customers. Additionally, we also manufacture our own range of engineering products under Lotus i brand. Our qualified, technical staff will review your unique product specifications and identify the most efficient solution for your needs.

Products

- Valve Automation
- Instrumentation
- Valve Types - Ball / Multi-Turn / Butterfly / Plug / Knife Gate / Check / Diaphragm
- Speciality Products - Control & Regulators / 'Y' & Basket Strainer / Cartridge Filter
